Group

The Midwest Energy Efficiency Alliance is hosting the Ohio Energy Efficiency Expo to highlight the positive impact of the energy efficiency industry on the state's economy.

The Ohio Energy Efficiency Expo will demonstrate the benefits to consumers, businesses and the State of Ohio stemming from energy efficiency programs since 2009. This is a critical juncture for energy efficiency in Ohio, as the legislature is considering legislation that would essentially end any new investment in energy efficiency.

MEEA invites businesses operating in Ohio to participate in the Expo as exhibitors to demonstrate the economic contributions - jobs created and consumer savings achieved, among other metrics - that your business has made in Ohio and to reinforce the value of energy efficiency for consumers and for the local economy.

MEEA also invites energy efficiency advocates and interested stakeholders to attend the Expo and press conference. Lunch will be provided for exhibitors and light snacks for attendees.

**The deadline to register has been extended.
RSVP to attend the Expo and complete this exhibitor
form by Monday, May 5:**
